

Profile Summary

Senior Frontend Engineer with 6+ years of experience building and modernizing web applications across e-commerce, InsurTech, and marketing platforms. Experienced in React, Next.js, Vue, Nuxt, TypeScript, SSR architecture, and frontend performance optimization. Proven track record of migrating legacy systems, improving page performance, and designing maintainable frontend architectures. Experienced in AI-assisted engineering workflows for requirement analysis, architecture design, and design-to-code automation.

Skill

- **Frontend:** React, Next.js, Vue.js, Nuxt, AngularJS, TypeScript, HTML, CSS
- **UI & Styling:** Tailwind CSS, shadcn/ui, Element UI
- **Testing & Tooling:** Vitest, Playwright, Vite, ESLint, Git
- **Data & Integration:** Zod, i18n, Diagram.js, Chart.js, Google Maps API, REST APIs
- **AI-Assisted Development:** Codex, Antigravity, Cursor, GitHub Copilot

Work Experience

Sr. Frontend Engineer | Gamania Shopping

May 2024 ~ June 2026

- Architected and delivered a progressive, zero-downtime migration from a legacy .NET/AngularJS application to Next.js SSR, enabling incremental modernization while maintaining production availability.
- Optimized landing-page performance by reducing resource requests by 30% and page load time by 50%, while achieving a 100/100 Lighthouse SEO score.
- Engineered a Lottery Draw system, reducing FCP to 1.6 s for an enhanced first-screen user experience.
- Developed a lightweight BFF layer to centralize authentication checks and improve cache-resource management.
- Applied AI-assisted engineering workflows to accelerate requirement analysis and frontend architecture design.
- Utilized custom MCPs to automate precise Figma-to-code conversions.

Frontend Engineer | CTBC Insurance

Dec 2021 ~ Feb 2024

- Spearheaded the adoption of Vue.js within a legacy Java/JSP internal system, establishing a clearer separation between frontend and backend concerns.
- Modernized the frontend architecture to improve maintainability and enable faster feature development within the existing legacy environment.

Frontend Engineer | OakMega

May 2021 ~ Dec 2021

- Developed a no-code marketing campaign builder with Diagram.js, designing a coordinate-based interaction model for draggable, multi-condition workflow diagrams, that reduced dependence on engineering resources.

Frontend Engineer | HPi

Mar 2020 ~ May 2021

- Developed reusable LINE flex message template modules.
- Built an inventory management system from scratch using Vue.js.

Frontend Engineer | CTC

Apr 2019 ~ Feb 2020

- Built a construction site safety system, integrating BIM models and wearable devices to track personnel locations in real-time.

Project

Official Brand Website

Nuxt 3 · TypeScript · Pinia · Tailwind CSS · shadcn/ui · Prismic

- Built a brand website using Nuxt 3 and Prismic CMS, together with a Vue-based administration interface for managing custom content.
- Integrated the CMS-driven content architecture with reusable components to support ongoing content updates.

Construction Management

Vue 3 · TypeScript · Pinia · WebRTC · Google Maps API

- Integrated WebRTC to support live monitoring of video feeds.
- Implemented vehicle-route visualization using the Google Maps API.
