

Profile Summary

Frontend Engineer with over 6 years of experience, specializing in Vue, React, and SSR architecture. Strong at frontend-backend integration and web performance optimization. Adept at leveraging advanced AI workflows to design scalable web frontend architecture and maximize output quality. Diverse domain expertise spanning E-commerce, InsurTech, and LINE marketing.

Skill

- **Core** React, Next.js, Vue, Nuxt, Angular 1.6, TypeScript, JavaScript ES6, HTML/CSS
- **Styling** TailwindCSS, Shadcn-UI, Element-UI
- **Testing & Tools** Git, Vite, ESLint, Vitest, Playwright
- **Data** Zod, i18n, Diagram.js, Chart.js, Google Map API
- **AI** Cursor Desktop/IDE, Github Copilot, Gemini CLI

Work Experience

Sr. Frontend Engineer | Gamania Shopping

May 2024 ~ June 2026

- Architected and executed a zero-downtime, progressive migration from .NET/AngularJS setup to Next.js SSR.
- Optimized landing page performance, achieving a 30% reduction in resource requests, a 50% decrease in load times, and a 100/100 Lighthouse SEO score.
- Engineered a Lottery Draw system, reducing FCP to 1.6 s for an enhanced first-screen user experience.
- Developed a lightweight BFF API to streamline authentication checks and optimize cache resource disposal.
- Integrated AI tools to accelerate requirement analysis and technical architecture design.
- Utilized custom MCPs to automate precise Figma-to-code conversions.

Frontend Engineer | CTBC Insurance

Dec 2021 ~ Feb 2024

- Spearheaded the integration of Vue.js into a legacy Java/JSP internal system, decoupling frontend and backend codes to make the system easier to maintain and speed up development.

Frontend Engineer | OakMega

May 2021 ~ Dec 2021

- Delivered a no-code marketing campaign builder by design a coordinate system with Diagram.js to support draggable, multi-conditional flowcharts, that reduced dependence on engineering resources.

Frontend Engineer | HPi

Mar 2020 ~ May 2021

- Developed LINE flex message template modules.
- Built an inventory management system from scratch using Vue.js.

Frontend Engineer | CTC

Apr 2019 ~ Feb 2020

- Built a construction site safety system, integrating BIM models and wearable devices to track personnel locations in real-time.

Project

Official Brand Website

- Built the website with Nuxt.js and Prismic CMS, and created a Vue.js admin panel to manage custom content.
- Tech : Nuxt3, Pinia, Tailwind, Shadcn UI, TypeScript, Prismic SDK

Construction Management

- Utilized WebRTC for monitoring video feeds
- Plot vehicle routes by Google Maps.
- Tech : Vue3, Pinia, TypeScript, Google Map API
