

Profile Summary

Frontend Engineer with 6 years of experience, specializing in Vue, React, Next.js, and Server-Side Rendering (SSR). Experienced in building B2B insurance system, e-commerce platform, and LINE marketing system. Strong at frontend-backend integration and web performance optimization. Skilled at using AI tools (GitHub Copilot, Cursor, Gemini CLI) along with SKILL and MCP workflows to code faster, design architectures, and deliver high-quality results.

Skill

- **Core** Vue, Nuxt, React, Next.js, Angular 1.6, TypeScript
- **AI** Cursor, Github Copilot, Gemini CLI, SKILL, mcp
- **Tools & Testing** Git, Vite, ESLint, Vitest, Playwright
- **Data** Zod, i18n, Diagram.js, Chart.js, Google Map
- **Styling** Tailwind, Shadcn-UI, Element-UI

Work Experience

Sr. Frontend Engineer | Gamania Shopping

May 2024 ~ June 2026

- Led the development of a Next.js SSR online lottery system, improving page performance and SEO.
- Built lightweight Backend-for-Frontend (BFF) APIs using Next.js to revalidate data fetching.
- Refactor .NET/Angular 1.6 system into Next.js.
- Set SKILL as a team standard to improve overall code quality.

Frontend Engineer | CTBC Insurance

Dec 2021 ~ Feb 2024

- Introduced Vue.js to a legacy Java/JSP internal system. Separated frontend and backend code to make the system easier to maintain and speed up development.

Frontend Engineer | OakMega

May 2021 ~ Dec 2021

- Built a "Member Journey" feature using Diagram.js, creating an easy-to-use flowchart interface for marketing operations.

Frontend Engineer | HPI

Mar 2020 ~ May 2021

- Developed LINE flex message template modules.
- Built an inventory management system from scratch using Vue.js.

Frontend Engineer | CTC

Apr 2019 ~ Feb 2020

- Built a construction site safety system, integrating BIM models and wearable devices to track personnel locations in real-time.

Project

Online Lottery

- Adopted Next15 SSR to optimize page performance and SEO.
- Tech : Next15, React Context, Winston log, Tailwind, Shadcn UI, TypeScript

Official Brand Website

- Built the website with Nuxt.js and Prismic CMS, and created a Vue.js admin panel to manage custom content.
- Tech : Nuxt3, Pinia, Tailwind, Shadcn UI, TypeScript, Prismic SDK

Construction Management

- Utilized WebRTC for monitoring video feeds
- Plot vehicle routes by Google Maps.
- Tech : Vue3, Pinia, TypeScript, Google Map API

Member Journey

- Built a drag-and-drop flowchart with custom coordinates and condition checks using Diagram.js.
- Tech : Vue2, Vuex, Diagram.js, Element UI
